

XM satalite radio has provided me with up to date radio broadcasting that enriches my life in all facets. Specifically, current traffic, weather, and current events. Further, there is a choice of music from fine arts, opera and to rock & roll. The Right & Left America stations provide a balance of information from both sides on current events. I consider the low cost of \$9.99 per month is a steal, in that, so much is provided to the listener. My brother lives in a rural area where ammenities are few and far in between and XM radio provides a cultural outlet for him. I strongly urge the FCC to allow free American citizens the right to choose their entertainment.

Respectfully,

Carol Shield
